# GSI SLV Corporate e-Learning

## Learning 4.0 in welding technology

Welding technology is subject to constant technological change. Along with new materials, harmonised regulations, and new production techniques, quality requirements are increasing not only for products, but for the welding technology personnel as well. To keep up with these developments, ongoing training becomes increasingly important. GSI e-Learning works with you to develop an individualised interactive welding technology learning programme tailored to meet your company's needs.

## Digital learning media, flexibly tailored to your company

In corporate learning, we focus on e-Learning solutions customised for a specific company. Our programmes aim to coordinate employee training with the individual needs of a company, taking its personnel and organisational structures into account. The employees' individual needs for further education and training can be ideally supplemented with corporate learning programmes.

### What we offer:

- Personal consultation for customised e-Learning and blended learning concepts
- Customisation of existing courses
- Integrated progress checks, documentation and analysis
- Installation of your own learning platform, also according to an individual design
- Course contents based on quality management systems

### How you benefit:

- Courses adapted to your company's specific needs with easy updating of materials
- Individual group sizes and assessment options (e.g. by learning status)
- Prompt training of employees with no long absences required
- Use of the internet without requiring in-house administration
- No or considerably lower extra costs such as for travel or accommodation

### e-Learning at a glance:

- Innovative learning with modern methods and teaching strategies
- e-Learning takes place at or near the workplace
- Simple, intuitive navigation and handling
- Sustained learning results combined with an immediate sense of achievement
